

Common WP Series applications

Our latest pressure innovation, the WP Series Liquid Pressure Transducers, comes in both gauge and differential pressure models. Both models feature pressure ranges of 5 to 500 PSIG/D. Outlined below are some of the many applications for the gauge model (WP-G Series) and the differential model (WP-D Series).

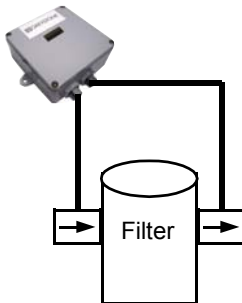

**Plate Heat Exchanger
(differential pressure)**

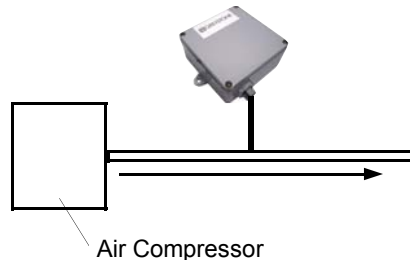

**Water Pump
(gauge pressure)**

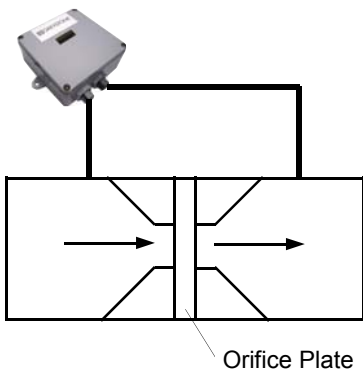

**Filter Function
(differential pressure)**

**Air Compressor
(gauge pressure)**

**Orifice Plate
(differential pressure)**

**Fluid Level
(differential pressure)**
