

GREYSTONE
ACCURACY BY DESIGN

Our New Look

But the same quality that our customers have become accustomed to.

Greystone is proud to announce the release of our "NEW" wall mount enclosure the "Continental"

The "Continental" is an attractive, low profile design with numerous top bottom and back vents to allow for optimum airflow movement through the enclosure.

It is now our standard wall mount offering on all our CDD lines of CO2 Transducers and has provisions for add-on features such as setpoint adjustment and manual override on various models. It is able to accommodate a large size LCD as well as allow for brand labeling.

Please stay tuned as we introduce a wide range of our products in this new enclosure

For more information on this and other Greystone products, please contact your area representative

***Peace of mind
through reliable sensors***
